## Experience

### Web Application Designer - Distance Education

January 2004-present

This position primarily works with web and application development to run the Distance Minnesota website. Other work includes design input to the Minnesota Online webpages and its consortium group, eLect.

#### Distance Minnesota

- Site primarily programmed in php with use of Javascript as needed.
- Use CSS to generate page layout and appearance. CSS-Positioned Div tags utilized rather than tables wherever possible.
- Program pages (including curriculum and costs) are dynamically generated by data pulls from mysql databases stored on individual college servers. The applications are programmed for immediate updates to the web.
- Created several web forms that either write data into databases, or email data directly where it needs to go.
- Created a file management system that allows you to upload files to the server, and organize how they will be displayed on the web and in what order.
- Implemented and programmed to the web the application Online Course Planning found at <http://distance.minnesota.edu/ocp>.
- Worked with a team to implement Online College in the High School web site. Work included designing, layout and programming. <http://distance.minnesota.edu/ochs>.

#### Minnesota Online

- Update and design input to Minnesota Online website. <http://minneotaonline.org>
- Update and design input to the Minnesota Online consortium of eLect <http://www.elect.mnscu.edu/>
- Implemented design and layout for RightNow interfaces: <http://minnesotaonlinesupport.org>, <http://mymilitaryeducation.org>, <http://distancemn.custhelp.com>

### Assistant Web Application Designer - MSCTC College

April-July 2004

- Hired to assist the Web Application Designer with various projects.

### Internship Mind Tremors Inc.

2003

- Used HTML, CSS, CSE validator, and Microsoft Visual .Net
- Verified Code, updated old sites, and created layout based on Adobe Photoshop Images.
- Worked with a team of 3 coders and 1 designer.

### Freelance Design

#### *Withinshadowsreach.com*

2006-present

- Created coding for the site of a local gaming group..
- Page layout made with CSS positioning, every element is in its own DIV tag and aligned on top of each other like layers in Photoshop. The half circle links on the top and bottom are done with Image maps. Every player can create a profile for their Character – adding them to the Kindred and Contacts page. One player has the position of "Harpy" and it is that characters job to keep track of records (status/position). The player can actually log into the website and edit both of these pages through the Database.

#### *Whohasinspireyou.com*

2007-present

- Created coding for a Miss Minnesota contestant website. It is made so that the family can update the text on ever page via a database.

## Other Skills

- Proficient and extensive skills in php
- Code to the W3C web standards for best cross browser compatibility
- ADA Compliance in web authoring
- Can modify, resize touch up digital images and photos
- Excellent verbal and communication skills
- Skilled at explaining IT concepts to non-IT staff
- High-end customer service
- Proven time management skills with the ability to manage multiple projects
- Strong documentation skills
